ABSTRACT

Bibliographic data, physical characteristics, contents, prices, and ordering instructions for Spanish and Portuguese instructional materials listed in this issue of the Materials Acquisition Project are provided for each entry. Subject categories include general works, social science, language arts, pure science, technology, the arts, literature, and history. Materials are classified according to the Dewey decimal system by subject matter, with related subject areas utilized. The annotation is an objective description of materials and often includes suggestions concerning appropriate grade-level and utilization of materials. The bibliographic materials are generally adapted for use by bilingual teachers. Many familiar works included in the compilation have been translated from foreign languages into Spanish. For the companion documents, see FL 002 968-FL 002 975 and FL 002 977. (RL)

MATERIALS ACQUISITION PROJECT

San Diego City Schools

NOVEMBER 1971 2950 NATIONAL AVE. SAN DIEGO, CALIFORNIA 92113 Volume 2 No. 4

ACQUISITIONS IN SPAIN AND PORTUGAL

Project Coordinator Rafael M. Fernández went to Spain and Portugal early this fall to acquire more materials. Arriving in Barcelona on August 29, he visited publishers and distributors there and in Bilbao, Madrid, and Lisbon during a six-week period,departing from Lisbon on October 12.

At Editoriales Anaya, Prima Luce, Teide, and Vasco Americana and Librarfa Bosch in Spain he purchased 5,590 separate titles and 11,055 total items. At Livraria Portugal he purchased 1,288 separate titles and 2,712 total items. His acquisitions amounted to 6,878 separate titles and 13,767 total items.

Materials were not the only items of value he acquired on his visits. With the assistance of American Consulates in Spain and Portugal he also acquired much valuable information on Spanish and Portuguese publishing, distributing, and shipping.

Several of the Portuguese books he bought have already been annotated, and they can be found on the final page of the current publication. The Project staff expects to expand the number of pages on Portuguese materials significantly now that such a large supply of them are available for annotation.
